

Join us in our free half day seminar about Power Quality with PSL

The seminar will be held on the 24th of May '18 on Hotel Sabro near Aarhus

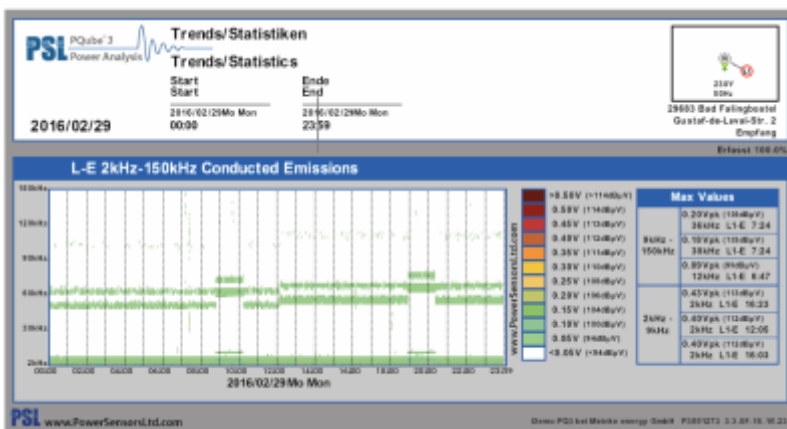

We are pleased to invite you to a seminar about power quality with Alex McEachern, founder of Power Standards Lab and the AC power analyzer - PQube. Alex is a senior member of the IEEE and has written many of the most important power quality standards.

Power Standards Lab, PSL, is represented in Denmark by Altoo Measurement Science. PSL has a product portfolio of small AC analyzers PQube 3. Measurements includes AC/DC voltages and current on 16.67 Hz, 50Hz, 60Hz or 400Hz, 2kHz to 150kHz conducted emissions, high frequency impulses at 4MHz, flicker and voltage harmonics. Starting prices from DKK 13.643,-.

Power Standards Lab, USA

Agenda for the 24th of May 2018

- **12.30-13.00** Welcome and coffee/tea/water
- **13.00-13.45:**
"Interesting real-world Power Quality problems in Denmark, Europe and around the globe"
(Alex McEachern - PSL)
- **13.45-14.30**
"2-150KHz"
Supra-Harmonics. A very interesting frequency range to have a closer look at.
A new Power Quality problem.
(Alex McEachern - PSL)
- **14.30-15.00**
Break and buffet with coffee/tea and cake
- **15.00-15.45**
"Latest Power Quality Technologies and Global Research Projects"
 - Micro-synchrophasors on distribution networks and grid stability
 - Smart Grids and Power Quality
 - "Big Data" initiatives
 - Opportunities for European participation in worldwide research projects
(Alex McEachern - PSL)
- **15.45-16.00:** Further questions and end of the day.

All sessions will be presented in English.

Venue:

Montra Hotel Sabro Kro
Viborgvej 780
8471 Sabro

PSL PQube3e Power Analyzer

Sign up and registration

You are welcome to write back on this mail or call us no later than 10st of May

Please include:

Your name and company.

Email and phone number.

We have a limited number of seats.

Best Regards

Altoo Measurement Science
